Capabilities Statement

- ⇒ VA Certified Veteran Owned Small Business
- ⇒ MA SDO Certified VBE & SDB
- ⇒ Active Government TS Security Clearance
- ⇒ Current SAM registration
- ⇒ Accept all credit cards

About Us

Critical Prism Defense LLC assists small businesses in the defense industrial base with their mission to protect government information by providing NIST compliant training programs for staff, cyber security assessments and implementation strategies for FAR 52.204-21 & DFARS 252.204-7012, & 7019/7020/7021, risk management framework, ICT supply chain risk management, cybersecurity architecture and design for product development.

Why choose Critical Prism Defense LLC?

We are a small business that investigates cost effective and innovative ways to use cybersecurity as a strategic advantage without a major disruption to the way we need to work in today's digital & remote age. We look for strategic methods for achieving compliance by reaching out to organizations that can provide no-to low cost services for your company. Then we put our innovation and agility to work, filling in the gaps with products, services and/or training. Long term relationships are established and we continue to work with your organization understanding changes in contracts and how it will impact your engineering and manufacturing lifecycles.

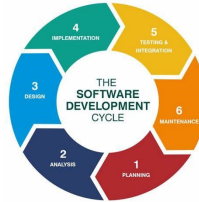

Cybersecurity Awareness Education and Training

- Automated online platform
- Robust reporting capabilities
- Customizable for employee roles and disciplines
- Phishing simulator & Reporting Tools
- Cybersecurity staff training [CompTIA, (ISC)2, ISA-CA, IAPP, Cisco Microsoft and more]

Security Assessments and Documentation

- NIST SP 800-53 for product development & classified systems
- NIST SP800-171/172 for FAR & DFARS compliance
- Cybersecurity Maturity Model Level 1-3 *Registered Practitioner and Certified Assessor roles (when we receive certification)*

Cybersecurity Engineering

- Strategic steering for hardware engineering, secure software development, DevSecOps cultures
- Influence product engineering and design phases
- Cybersecurity, Anti-Tamper & Cyber Resiliency solutions for meeting federal government engineering requirements (including embedded systems)
- Lean manufacturing and Agile organizations

Information and Communications Technologies Supply Chain Risk Management

- Generating Software Bills of Material
- Work with suppliers to reduce your inherited risks
- ICT Supply Chain Risk Management programs
- Customized ICT SCRm training
- Identification of components in products at risk
- Integrate with your current ISO, Lean and CMMI processes

NAICS Codes

- 541512
- 541618
- 541519
- 541611
- 541690
- 561320
- 611420

Past Performance

United States Navy— Electronics technician and information technology technician implementing and maintaining secure networks and operational assets.

Large Defense Contractor—Risk management & information assurance for IT and operational technology assets for the Air Force space and missile defense missions. Operated and maintained NIPRNet and SIPRNet circuits and systems, satellite communications and phased array radar system.

Federally Funded Research and Development Center— Risk management framework for IT assets supporting R&D for space and missile defense missions for the department of defense.

Not-for-profit R&D company— Developed IT & cybersecurity strategies for deploying and maintaining secure infrastructures for R&D of advanced technologies for national defense & national security missions. Designed and deployed several small business size networks up to high performance computing and hyperconverged infrastructures.

Electronics, robotics and engineering small business—Cybersecurity engineering for developed products for the Navy. Compliance assessments, security training and awareness program for NIST compliance. Risk management framework for developed products. Developed strategies for recuperation of costs and classified engineering capabilities for corporate strategic advantage.

Channel Sales Partner for

The [InfosecIQ platform](#) empower employees with knowledge and skills to stay cyber secure at work and home. 2,000+ security awareness resources and phishing simulations aligned to employee learning styles help you change behaviors and culture. The [Infosec Skills](#) platform provides a variety of training methods and courses for your cybersecurity team to gain proficiency.

Continuous Security & Compliance
The [CimTrak Integrity Suite](#) provides a comprehensive set of security, auditing, and compliance tools to ensure the integrity of your entire IT Infrastructure.

Professional Certifications

- [\(ISC\)2 CISSP](#)—92149
